DIY Your Own Beaded Plant

1. Choose a pot

2. Decorate your pot if you want to.

3. Add soil? If so using your choose of tissue paper and a glue stick add your soil.

4. Now pick 4-6 pieces of wire.

5. Put glue on one end of your wire and push the wires you want all the way into your soil.

6. Using the beads on the tables and start beading your wires.

7. Make your own designs and have fun.

8. There are additional colors on the front table. Use a small cup and a spoon to collect and bring back your spot.

9. Once you're all done, leave enough wire to fold wire over your last bead and twist around and cut off any extra wire if any.

10. Now show off to your friends and family.
